

Varn Aqua Conditioner...

Hardening agent for fully desalinated water...

Varn Aqua Conditioner is used in fully desalinated water to adjust the hardness to approximately 9°d, which is considered to be optimum water conditions for lithographic printing. Varn Aqua Conditioner does not contain ingredients which will disturb the printing process. Varn Aqua Conditioner stabilises the incoming water to press and therefore enables accurate and constant pH & conductivity values of the mixed dampening solution to be maintained.

PRODUCT BENEFITS

Stabilises water supply

Compatible with all of the Varn fount range

Meets OEM criteria for incoming water

Features	Advantages	Benefits
Optimises water conditions	<ul style="list-style-type: none"> improved ink/water balance 	<ul style="list-style-type: none"> improved print quality
Eliminates erratic water conditions	<ul style="list-style-type: none"> stable water supply 	<ul style="list-style-type: none"> consistent print quality
Compatible with the Varn Doser	<ul style="list-style-type: none"> ease of application 	<ul style="list-style-type: none"> economy of use
Compatible with all of the Varn fount range	<ul style="list-style-type: none"> versatility 	<ul style="list-style-type: none"> one product for all applications

PACKAGING

Directions...
