

Radiant, white & glossy Biogloss, the beautiful one

Bright white, glossy, double-coated on both sides.
Excellent results in offset printing. Suitable for various
varnishing techniques.

The white, glossy surface creates a radiant impression.
Technically perfected, biogloss is a graphic paper for
text and real art printing applications.

Print Information

Very good printing results in offset. Inks dry quickly and the next stage
can follow rapidly.

Finishing

Hot-foil stamping and relief embossing

Special features

Particularly suitable for folder advertising, books, magazines,
encyclopaedia and posters. Very good folding properties.

Service Information

Standard format stock for small quantities up to 3 tonnes

Format:	70 x 100	80, 90, 100, 115, 135 g/m ²
	100 x 70	80, 90, 100, 115, 135 g/m ²
