

Ideal for use in any Pressroom

VARN Calcium Deglazer

CLEANERS & REJUVENATORS

Specialist glaze remover

CALCIUM DEGLAZER is formulated to meet the ever-increasing problem of calcium build-up on rollers and blankets. Calcium build-up in the past has been attributed to ink pigments and water conditions, but due to the increasing amounts of fillers being used in coated stocks, the problem has increased dramatically.

CALCIUM DEGLAZER is dynamically effective in the removal of glaze from contaminated rollers and blankets, returning the rollers and blankets to their original condition.

CALCIUM DEGLAZER is approved by leading roller manufacturers.

CALCIUM DEGLAZER should be used in conjunction with Varn Cal-Kleen Fountain solution as part of a calcium reduction programme.

- **HIGHLY EFFECTIVE**
- **HIGHLY SPECIALISED**
- **ECONOMICAL**
- **REDUCES DOWNTIME**
- **OEM APPROVED**
- **ROLLER SAFE**

DIRECTIONS

Remove ink with **VARN WATER MISCIBLE BLANKET AND ROLLER WASH**. Apply a thin layer to the roller or blanket. Do not allow roller to run dry. Leave for 5-10 minutes and wash off with water. Finally, clean off with **VARN WATER MISCIBLE BLANKET AND ROLLER WASH**. The product has a distinct smell during application. Can be diluted 1:1 with water for application in enclosed areas.

NB: Shake well before use.
