### DIRECTIONS

#### Blankets:

Use as a normal wash-up after long runs, when changing from dark to light ink and as part of a daily maintenance programme. Because of fast drying speed and outstanding cleaning action, a blanket maintenance wash actually takes less time than a regular wash.

#### Rollers:

Outstanding for hand cleaning rubber and steel rollers out of the press and the cleaning of roller ends on the press. While **SUPER RUBBER REJUVENATOR** dries too fast for most regular roller wash-ups, it may be added to a regular wash to improve cleaning action and increase drying speed as part of a maintenance wash-up programme.

#### Rubber parts:

The periodic use of **SUPER RUBBER REJUVENATOR** will add new life to feeder rollers on press and on folders, suction cups and other rubber parts used in both printing and general industry.

**NOT RECOMMENDED FOR USE ON URETHANE ROLLERS.**
