

VARN VWM Wash

WASHES

Economical water miscible roller & blanket wash

VWM is a water miscible, one step wash formulated to meet ecological requirements for safety in roller and blanket washes.

VWM is water miscible, which means that it does not contain water but readily mixes with water to effectively remove all gum glaze and paper fibres.

VWM sells for less than most water miscible washes and for additional economy, it can be mixed with up to 25% water without reducing its cleaning action. This also reduces the evaporation vapours and the total volume of wash used.

- **WATER MISCIBLE**
- **PLATE-SAFE ON MAJORITY OF NEGATIVE/POSITIVE PRINTING PLATES**
- **ECONOMICAL**
- **CAN BE USED AS PART OF THE VARN PRESS MAINTENANCE SYSTEM**

FEATURES	ADVANTAGES	BENEFITS
WATER MISCIBLE	<ul style="list-style-type: none"> ● easily removes both water soluble and solvent soluble glaze, blanket piling and lint 	<ul style="list-style-type: none"> ● one application removes all debris

SUITABLE FOR USE ON BLANKETS AND ROLLERS	<ul style="list-style-type: none"> ● versatile 	<ul style="list-style-type: none"> ● one product for dual application
PLATE-SAFE ON WIDE RANGE OF NEGATIVE/ POSITIVE PRINTING PLATES	<ul style="list-style-type: none"> ● user friendly 	<ul style="list-style-type: none"> ● varied application

DIRECTIONS

Blankets:

Mix with water or apply to a dampened wash-up cloth to remove both water soluble and solvent soluble glaze, blanket piling and lint.

Rollers:

Use neat or mix with up to 25% water to remove gum glaze, paper fibres and lint. Use in conjunction with **VARN TAKE IT OFF** and **VARN CALCIUM DEGLAZER** as part of a regular press maintenance system.
